The ancient art of Feng Shui originated from China more than 3000 years ago. It is also known as Chinese Geomancy, concerned with studying the living environment of a person and understanding the relationship between man and the natural environment around him. Our tour is dedicated to this ancient practice and our guide, Diana Chua, will take us around town; Suntec City, Orchard road, the financial district, etc. She will point out interesting architectural features that are Feng Shui orientated and regale us with anecdotes about the things believers do to achieve balance, harmony and good fortune in their lives. We will visit a well known Geomancy centre to learn how Feng Shui is assessed, charted, applied and checked to ensure desired results. If you are curious about Feng Shui and what your “Four Pillars of Destiny can reveal about you, sign up fast. We need all the good luck we can get in the year of the Golden Tiger!

Welcome!
